PROFESSIONAL SUMMARY

- **Senior Frontend Engineer** with **10+ years** of experience specializing in **TypeScript, React, and scalable web architectures**. Expert in building enterprise-grade applications with proven track record of delivering **2x performance improvements** and leading high-performing teams.
- Proven problem solver with expertise in **performance optimization, micro-frontend architecture, and complex UI challenges**. Successfully mentored **15+ developers** and led technical initiatives across multiple product teams.
- Strong technical leadership experience growing teams, implementing robust testing practices, and delivering mission-critical applications serving **thousands of daily users**.

EXPERIENCE

- **Hopsworks** Stockholm, Sweden
Lead Frontend Engineer *Feb 2022 – Present*
 - **Hopsworks-UI: Architected and redesigned** the Web interface for Hopsworks AI Lakehouse using **TypeScript and React**, achieving a **2x faster page load time** and **40% reduction in bundle size**. Established robust **End-to-End** and **unit testing practices** with **95% code coverage**, significantly enhancing product quality and feature delivery.
 - **File Browser: Developed and optimized** a complex File Browser with command-line interface using **TypeScript and React**, implementing **virtual scrolling for 10K+ files** and boosting customer satisfaction by **35%** through enhanced usability.
 - **Technical Leadership: Mentored 6+ junior and mid-level developers** in **TypeScript, React, and modern frontend practices**, establishing coding standards and best practices that improved code quality and team productivity by **30%**.
 - **Team Leadership: Implemented structured code review processes** and **Agile methodologies**. Facilitated technical planning sessions ensuring **100% on-time feature delivery** and continuous improvement.
 - **Quartz Component Library: Architected and built** a comprehensive **TypeScript React component library** with **50+ reusable components**, reducing development time by **60%** and enabling consistent UI patterns across 8 product teams.
- **Snow Software** Stockholm, Sweden
Senior Software Engineer *Aug 2020 – Feb 2022*
 - **Portal Core Platform: Architected and built** the core web application using **React + TypeScript** that seamlessly integrates multiple micro-frontends. Implemented **server-configured dynamic routing** and **runtime module loading**, enabling flexible deployment of **10+ micro-frontends** across different teams.
 - **Backend for Frontend: Developed a Go-based BFF service** to aggregate data and optimize API calls for the Portal platform, reducing frontend API requests by **70%** and improving page load performance by **40%**.
 - **Web Service Template: Created** a standardized **React + TypeScript** app template adopted by **12 development teams**, reducing project setup time by **80%** and ensuring consistent architecture patterns across the organization.
 - **Micro Frontend Architecture: Led migration** of 8 legacy applications to **micro-frontend architecture** using **TypeScript and Webpack Module Federation**, improving deployment frequency by **300%** and enabling autonomous team development for **50+ developers**.
 - **Automated Documentation Platform: Designed and implemented** an intelligent documentation system with **CI/CD pipeline** that automatically extracts, processes, and indexes enterprise documentation into a **searchable database**. Built **React + TypeScript** components with **REST API** integration, delivering contextual in-app documentation.
- **Swedish Startup Recruitment** Stockholm, Sweden
Software Engineer *Jan 2019 – Jul 2020*
 - **Teemyco Virtual Office: Built and optimized** an **Electron desktop application** using **TypeScript and React**, implementing real-time video features and custom UI components serving **5K+ daily active users**.

- **GydEd Education Platform: Developed** a comprehensive **React + TypeScript** web application for school management, implementing complex data visualizations and real-time notifications serving **100+ schools**.
- **Qasa Rental Platform: Enhanced and optimized** a multi-country rental platform using **React and TypeScript**, implementing **advanced search algorithms** and **payment integrations** across 4 European markets.
- **Leeroy Analytics Dashboard: Built** a comprehensive **React + TypeScript** management dashboard with **D3.js data visualizations**, processing **1M+ transactions daily** across **200+ restaurant branches**.
- **8Bitiz** Istanbul, Turkey
Software Engineer Feb 2018 – Jan 2019
 - **Pasabahce Mobile App: Architected and developed** a mobile application for product catalog using **React Native + TypeScript**, successfully **migrating 10K+ lines from Swift** and improving development velocity by **50%**.
 - **8Bitiz Corporate Website: Built** a high-performance animated corporate website using **ReasonML, React, and Node.js**, migrating from WordPress and achieving **4x faster load times** with custom animations.
- **Abgostaran** Tehran, Iran
Frontend Developer Jun 2017 – Feb 2018
 - **Dynamic Form Builder: Implemented** a sophisticated **React + TypeScript** form-generator system with drag-and-drop interface, reducing form creation time by **90%** and enabling non-technical users to build complex forms.
 - **Analytics Mobile App: Designed and developed** a data visualization mobile application using **React Native + Recharts**, processing and displaying **real-time analytics** for business intelligence.
- **IranTIP** Tehran, Iran
Frontend Developer Oct 2016 – Jun 2017
 - **Investment Platform: Built** a comprehensive **React + Webpack** platform connecting investors and startups, implementing **advanced matching algorithms** and interactive data visualizations serving **1000+ users**.

TECHNICAL SKILLS

- **Frontend Expert:** TypeScript (10+ years), JavaScript ES6+, React (8+ years), Next.js, HTML5/CSS3
- **Architecture & Tools:** Micro-frontends, Webpack, Vite, Vitest, Testing Library, React Query, Redux
- **Performance & Quality:** Code splitting, Lazy loading, Bundle optimization, E2E testing, Performance monitoring
- **UI & Design Systems:** Component libraries, Figma, Responsive design
- **Backend & DevOps:** Node.js, Express, GraphQL, REST APIs, Docker, GCP, CI/CD, Git
- **Other Languages:** Python, SQL, Scala (Learning)

EDUCATION

- **Sharif University of Technology** Tehran, Iran
Master of Computer Networks; Aug 2014 – Jul 2016
- **Amirkabir University of Technology** Tehran, Iran
Bachelor of Information Technology Aug 2009 – Jul 2014
